

Kajal Tiwari

Frontend Developer(React)

PROFESSIONAL SUMMARY

Passionate front-end developer with a strong foundation in HTML, CSS, JavaScript, React, and Redux. Quick learner with a keen interest in improving coding practices, problem solving, and staying updated with modern web technologies. Eager to apply my skills to build dynamic, responsive, and user-friendly web applications and contribute to impactful projects.

PROJECTS

1. Apna Bazar | |

JavaScript | HTML5 | CSS3 | Glitch

- Developed a dynamic and user-friendly shopping application using JavaScript, HTML5, CSS and Glitch.
- Implemented interactive features such as Hamburger menu, carousels, and product pages with backend integration.Banners.
- Executed selective search functionality to enhance user experience and ease navigation.
- Used Glitch to host and manage product data.
- Ensured responsiveness and optimal performance across various devices.
- Independently managed and delivered the project in 3-4 days.
